DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U. S. Pat. 4,280,990 to Jagodzinski et al.

The abstract of the Jagodzinski patent describes a Claus process for obtaining elemental sulfur from a hydrogen sulfide-containing gas. The process is based on the discovery that the conventional Claus catalyst, in the presence of liquid sulfur and at pressures considerably greater than one atmosphere, is significantly active for the Claus catalytic reaction. The process involves introducing a hydrogen sulfide and sulfur dioxide-containing gas into a catalytic reactor, and reacting the gases in a Claus catalyst to produce elemental sulfur, under such conditions that sulfur vapor is condensed onto the catalyst bed.

References Made of Record

The following additional references from the examiner's search are made of record:

U. S. Pat. 5,023,069 disclosing a process for removing sulfur moieties from a Claus tail gas;

U. S. Pat. 5,047,216 disclosing an apparatus for recovering elemental sulphur, and

US 2005/0135983 A1 disclosing a direct sulfur recovery system.
